

Digestive Trouble and Vitälzȳm Testimonials

DIGESTIVE PROBLEMS

As I aged, my body's digestive system stopped working with me and turned against me. I HAD chronic digestive issues such as bloating and gas. My doctor put me on some sort of gastro intestinal medication that only made things worse. I decided to search for other options and that is when I came Vitälzȳm. I noticed that within a week of taking Vitälzȳm, my digestive system took a turn for the better. I no longer had disturbing gas and my stomach bloating seemed to be only minimal.

I really don't remember when I started using Vitalzym, or how long it took; I just remember realizing one day that I didn't have reflux anymore--I had actually forgotten I ever had the problem. I can't tell you how many times doctors tried to get me to use the little pills that stop the stomach acid. I suppose I am not your average patient, but I really felt that was a stupid solution to this problem. How could compromising my digestion solve *any* health problem? I started using Vitalzym for my liver. A functional test determined that I have a phase II detox deficiency, so I thought using Vitalzym would help lighten my liver's load. It was probably 3-4 months before I noticed the added benefit. The product did help my liver a lot. I recommended the product to a friend who has breast cancer, which metastasized to her liver. She also said it helped her liver. I really appreciate Vitalzym, and tell many people about it.

Thank you for a wonderful product. It was introduced to me by the owner of my health food store who only carries what he believes in. In fact he is also taking it. I have suffered all my life from chronic constipation and have tried many products with only bad results. My Internist practices alternative medicine and is recommending Vitälzȳm to his patients. I believe that if I could have used this product many years ago I would not have had to suffer from debilitating illnesses. Thank you, thank you!!!!!!!!!!
